TSBECM 202

SYNTHETIC DRAFTING STUDY | NOT FOR CONSTRUCTION

ROOF PLAN AND STRUCTURAL GRID

INDUSTRIAL WORKSHOP / 24 m x 36 m

S01 | REV A

Native geometry + dimensions | Model: mm | Plot at 100% / actual size

SCALE 1:100 | 594 x 420 mm

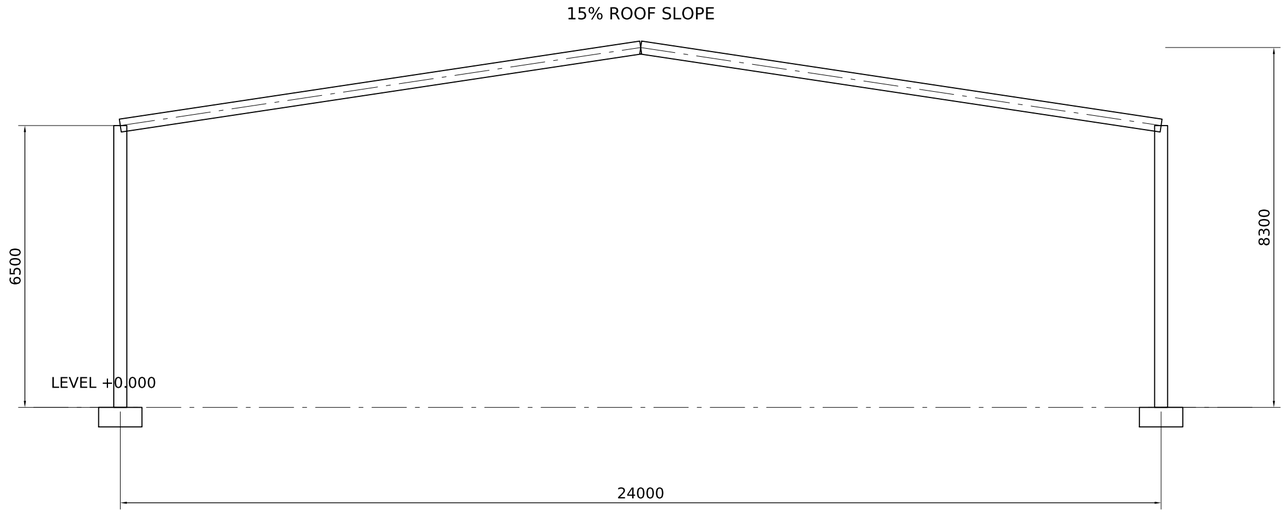

Member outlines, bracing and plate patterns are educational drafting inputs.

No structural sizing, material grades, plate thicknesses or foundation design are provided.

TSBECM 202

TRANSVERSE FRAME AND LONGITUDINAL ELEVATION

TRANSVERSE FRAME / GRID 1-7

ILLUSTRATIVE MEMBER DEPTH: 300

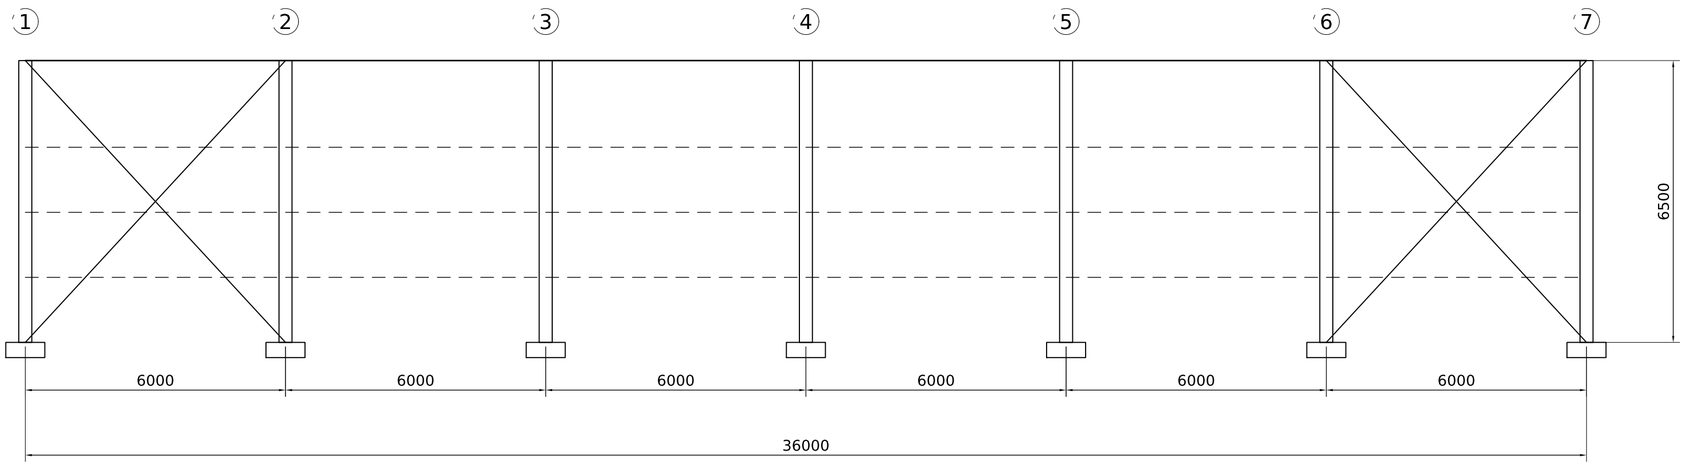

Roof rise = 12000 x 0.15 = 1800

Ridge level = 6500 + 1800 = 8300

Member sections are not selected.

Refer to S03 for plate patterns.

LONGITUDINAL ELEVATION / AXIS A

INDUSTRIAL WORKSHOP / 24 m x 36 m

Native geometry + dimensions | Model: mm | Plot at 100% / actual size

Member outlines, bracing and plate patterns are educational drafting inputs.

No structural sizing, material grades, plate thicknesses or foundation design are provided.

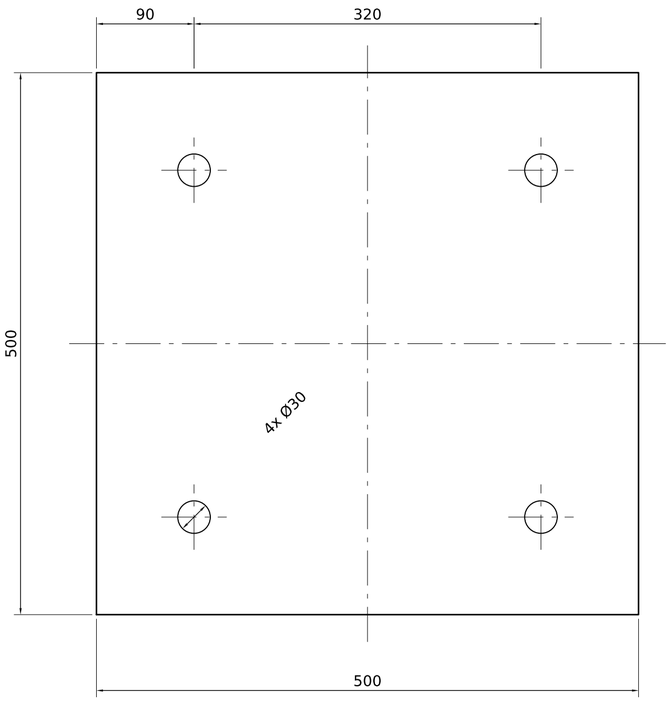

S02 | REV A

SCALE 1:100 | 594 x 420 mm

TSBECM 202

DIMENSIONED PLATE PATTERNS

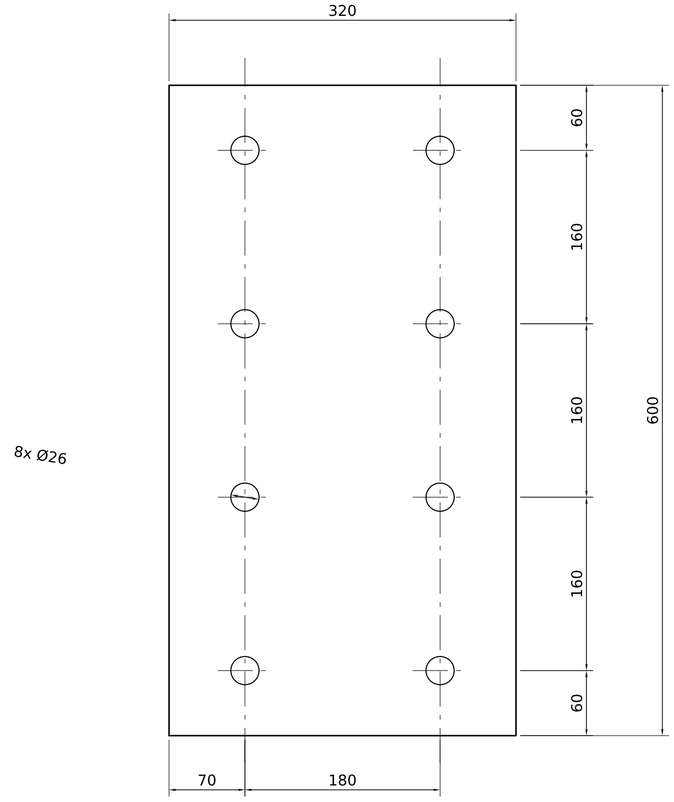

D01 / BASE PLATE PATTERN

4 HOLES, DIAMETER 30

THICKNESS / MATERIAL / ANCHORS: NOT SPECIFIED

D02 / END PLATE PATTERN

8 HOLES, DIAMETER 26

BOLT SIZE / GRADE / WELDS: NOT SPECIFIED

INDUSTRIAL WORKSHOP / 24 m x 36 m

Native geometry + dimensions | Model: mm | Plot at 100% / actual size

Member outlines, bracing and plate patterns are educational drafting inputs.

No structural sizing, material grades, plate thicknesses or foundation design are provided.

S03 | REV A

SCALE 1:4 | 594 x 420 mm
